

SAFE TRAVELER NEWS

START HERE DOWNLOAD HELP

How to get your Safe Traveler News file, open it, fill it in, and print it — in big print, step by step.

LARGE PRINT EDITION — type it in on your screen, or print it and write by hand.

What's inside

- On an iPhone or iPad
- On an Android phone or tablet
- On a Windows computer
- On a Mac
- Filling it in, printing it, and what to do if you get stuck

First — where your file is

After checkout, your download link arrives by email. Tap or click that link and the file (a PDF) saves to your device. If you cannot find the email, check your spam or junk folder for a message from Safe Traveler News.

The file is yours to keep. Download it once, and you can print fresh copies before every trip.

On an iPhone or iPad

- Tap the download link in your email.
- When the file opens on screen, tap the Share button (the square with an arrow pointing up).
- Choose “Save to Files,” then tap Save.
- To open it later: open the Files app, tap Downloads, and tap your file.
- To fill it in on screen: open the file and tap a box — if typing works, type. If it does not, no problem: every page is made to print and fill in by hand.

On an Android phone or tablet

- Tap the download link in your email.
- The file saves to your Downloads. If it does not open on its own, open the Files (or My Files) app and look in Downloads.
- Tap the file to open it in your PDF viewer.
- To fill it in on screen: tap a box and type if your viewer allows it — otherwise print and write by hand; the pages are designed for both.

On a Windows computer

- Click the download link in your email.
- The file lands in your Downloads folder. (In most browsers, press Ctrl + J to see recent downloads.)
- Double-click the file to open it. It opens in Microsoft Edge or Adobe Reader — both fill in the boxes: just click a box and type.
- Save your filled-in copy with a new name (File → Save As) so the blank original stays clean.

On a Mac

- Click the download link in your email.
- Find the file in your Downloads folder (Finder → Downloads).
- Double-click to open it in Preview. Click any box and type to fill it in.
- Use File → Save to keep your answers, or Export a copy under a new name to keep a blank original.

Printing

- Print on Letter size (8.5 × 11 in), at “Actual size” or 100% — not “Fit to page,” which shrinks the big print.
- Print the day-of-travel sheet and the wallet card twice: one to carry, one spare.
- A library or office-supply store can print the file from your email if you do not have a printer.

If you get stuck

Email us at 906up@agentmail.to with the name of the product you bought, and we will help you get your file. Please do not send passwords, card numbers, or any private information in that email — we will never ask for them.

Sources & a final word

Everything in this kit traces to official guidance. Requirements change — before every trip, check the current official source:

- U.S. Department of State — travel.state.gov — International travel, destination pages, STEP enrollment
- CDC Travelers' Health — wwwnc.cdc.gov/travel — Destination health guidance and the Pack Smart checklist
- Medicare — medicare.gov — What your coverage does and does not do outside the U.S.
- U.S. DOT — transportation.gov/airconsumer — Airline commitments and traveler rights
- FTC — consumer.ftc.gov — Travel scam alerts and how to report fraud

Every Safe Traveler News product is large print by design: big type, big boxes, high contrast — made to be read and used at a kitchen table, not squinted at.

This kit is educational information, not professional advice, and it does not guarantee any outcome. Your providers and the official sources above are the final word.
